

# BLACK AND WHITE SOUP

The first time I made this for Deeann, she made such amazing sounds of happiness and ecstasy that I knew I had done something right! As you might imagine from the title, this is a combination of 2 soups: Black Bean Soup and Cheddar Cheese Soup. I never would have thought that these two soups would go together, but they do, and they are amazing!

It is important for both soups to be of similar viscosities, so either simmer the soup to thicken it, or add broth/water/milk as necessary to thin it so they match each other.

To serve, ladle a scoop of each soup at the same time into the bowl and garnish as desired. Personally, I prefer to use a bread bowl.

However you serve it, it's sure to be a hit!
